

The NOAA Tide & Currents tide charts that we linked to from the Website have been discontinued.

“This service of the NOAA Tides & Currents website will not be available after the 2011 calendar year.

Tide predictions for 2011 and future dates are now available from the [NOAA Tide Predictions](#) service.

This new service allows tide predictions to be generated for up to 2 years in advance, provides a graphical display as well as tabular listing of the predicted tides, **has options for downloading or printing**, and a number of other features.” - NOAA [emphasis mine – Ed.]

What you get now is a page like this: [link](#)

Notice that you can print a hard copy of the year’s tides. Not as compact as the old listings, but maybe easier to read.

These PDF files will be on the links of the PYC website.

Here is an interesting site which defaults to Haddam CT but has a map that you can scroll and find the tides up and down the CT River and beyond. Not very portable, but interesting to explore. [link](#)
